Physics notes - page 1

Electric charge is a conserved quantity. Like charges repel and unlike charges attract.

Coulomb's law gives the force between two point charges in a vacuum.

Paragraph 1: extractable text layer present.

Physics notes - page 2

The electric field of a point charge points radially away from a positive charge.

Gauss's law relates the electric flux through a closed surface to the enclosed charge.

Paragraph 2: extractable text layer present.

Physics notes - page 3

A capacitor stores energy in the electric field between its plates.

Magnetic fields are produced by moving charges and by changing electric fields.

Paragraph 3: extractable text layer present.
